

Penetration Testing Report

wt1

Generated at: 2025-10-29 20:53

Executive Summary

Target: https://example.com
Target Type: Web Application Penetration Testing
Scope Type: White Box
Timeframe: 2025-10-29 to 2025-10-29

Vulnerability Statistics

Metric	Count
Total Vulnerabilities	3
Critical	0
High	1
Medium	2
Low	0
Informational	0

Vulnerability Findings

1. Security Misconfiguration - MEDIUM

Description: The application does not handle exceptions in a secure manner, potentially exposing internal application logic or sensitive information.

Affected Component: search_cve_by_technologies method

Remediation: Handle exceptions more securely by logging only necessary information and avoiding detailed error messages.

Proof of Concept:

```
logger.error(f"Unexpected error searching NVD for {tech}: {str(e)}")
```

2. Insecure Direct Object References (IDOR) - MEDIUM

Description: The application allows users to access CVE data based on user input without proper validation, which could lead to unauthorized access to sensitive data.

Affected Component: search_cve_by_technologies method

Remediation: Implement proper access controls and validation to ensure that users can only access data they are authorized to view.

Proof of Concept:

```
params = {'keywordSearch': tech, 'resultsPerPage': 50}
```

3. Information Disclosure - HIGH

Description: The application logs error messages that may contain sensitive information, such as stack traces or API response details, which could be exploited by an attacker.

Affected Component: search_cve_by_technologies method

Remediation: Avoid logging sensitive information. Use generic error messages in logs and ensure that sensitive data is not included.

Proof of Concept:

```
logger.error(f"NVD API error for {tech}: {str(e)}")
```

Testing Steps

Step #	Title	Status	Completed At
1	██████ █ ████	Completed	2025-10-29 17:01
2	██████ ██████	Completed	2025-10-29 17:01
3	████ ██████████	Completed	2025-10-29 17:01
4	████ ██████	Completed	2025-10-29 17:01
